

of at least one of the open/close actions and the rotation; and
means for switching the source upon detecting.

of at least one of the open/close actions and the rotation; and

~~means for switching the source upon detecting.~~

22. The ~~vehicle-mounted~~ apparatus according to Claim 6, further comprising:

means for detecting the action of said second panel by a predetermined angle in terms

of at least one of the open/close actions and the rotation; and

means for switching the source upon detecting.

REMARKS

The above changes to the claims have been made, and new claims have been added, to delete the multiple-dependency of the claims.
